Forecast for Thursday 14 Jul 2022

Weather: Clear skies through the early hours then lead into a sunny start to the morning. Patchy cloud will build through the middle part of the morning, making the sunshine hazier at times. This cloud then dissipating again into the afternoon to allow more prolonged sunshine for the evening and clear skies for the night.

Chance of cloud-free hill tops above 600m: Predominantly 90% or greater, briefly dropping to 80%, mainly on western slopes, in the middle of the morning.

Low cloud and visibility: Cloud through the middle of the day largely above the summits, though the occasional patch may cover the highest summits above 700m, mainly in the morning. Otherwise, excellent visibility with clear views of distant hills.

Forecast for Friday 15 Jul 2022

Weather: Clear skies to start Friday. Cloud then spreading more widely across the park during the morning with the chance of an isolated spell of rain in association with this. Turning increasingly sunny and warm to end the day as the cloud breaks up for the evening.

Maximum wind: 10mph south-westerly winds in the morning, transitioning to 13mph north-westerly winds in the afternoon.

Chance of cloud-free hill tops 600m: 90% or greater to begin and end the day. 80% through the middle section.

Low cloud and visibility: Cloud largely above the summits but with occasional patches temporarily shrouding tops above 700m through the day. Visibility outside of this generally very good with clear views.

Temperature: **Valleys:** Plus 11 Celsius, rising to plus 22 Celsius.
At 600m: Plus 8 Celsius, rising to plus 15 Celsius.
Freezing level: Above the summits.
